PROFESSIONAL SUMMARY

Backend-Focused Full Stack Software Engineer with 2 years of experience building scalable microservices, distributed systems, and API-driven platforms using Rust, Java, and TypeScript. Experienced in designing and developing gRPC services, GraphQL integrations, and backend workflows for gaming and esports platforms. Skilled in PostgreSQL, DynamoDB, Redis, authentication systems, event-driven architectures, and microservice communication. Strong interest in backend engineering, system design, platform development, and building reliable high-performance software.

TECHNICAL SKILLS

Languages: Java, Rust, TypeScript, JavaScript, SQL

Backend & APIs: NestJS, Spring Boot, Node.js, REST, GraphQL, gRPC, Microservices

Frontend: Angular, React.js, Next.js

Databases: PostgreSQL, DynamoDB, MySQL, Redis

Tools & Technologies: Git, GraphQL Gateway, Redis Streams

Architecture & Concepts: Distributed Systems, Event-Driven Architecture, Concurrency Control, Scalability, RBAC, Authentication & Authorization, API Gateway, Caching, Database Design, System Design

PROFESSIONAL EXPERIENCE

Aretedge Innovations Pvt Ltd

Associate Software Engineer

Aug 2024 – May 2026

Hyderabad, India (On-site)

- Owned end-to-end design of Challenge Module, including backend workflows, database design, and API orchestration.
- Architected leaderboard allocation systems for ranking computation, updates, and concurrent score aggregation.
- Maintained gaming platform features (tournaments, matchmaking, rewards) serving 20K+ active users.
- Designed scalable microservices using Rust, Java, and NestJS for modular, independent deployment.
- Implemented REST, GraphQL, and gRPC APIs for low-latency and cross-service communication.
- Optimized PostgreSQL and DynamoDB schemas for transactional integrity and real-time read-heavy workloads.
- Improved performance using Redis caching, rate limiting, and API gateway patterns.
- Managed concurrency-sensitive reward processing and event-driven workflows ensuring system reliability.

Aspire Systems

Frontend Developer (Intern → Trainee)

Sep 2022 – Jun 2024

Chennai, India (Remote)

- Completed enterprise training in Angular, Java, Node.js, and MySQL for internal full-stack applications.
- Integrated Angular frontend with Java backend APIs following SDLC and enterprise coding standards.
- Contributed to debugging, feature development, and UI/UX improvements in enterprise environments.

PROJECTS

Personal Expense Tracker | Next.js, Supabase

- Built a full-stack application with direct Supabase integration, real-time CRUD, and time-based aggregation.

Student Management System | Angular, Java, Node.js, MySQL

- Developed academic system with RBAC and APIs for attendance, exams, and fee management.

E-Commerce System | Java, Spring Boot, JavaScript

- Built eCommerce workflows using layered backend architecture and modular service separation.

Travel Agency Platform | Angular, Node.js, MongoDB

- Developed responsive UI and REST APIs for travel data management and booking workflows.

EDUCATION

K.S.R College of Engineering

Bachelor of Engineering (B.E) – Computer Science and Engineering

Namakkal, Tamil Nadu, India

2019 – 2023

CERTIFICATIONS

Rust Programming Essentials – Edureka (2026) | **AWS DynamoDB Fundamentals** – Meta (2025)

Advanced React – Whizlabs (2025) | **Google Prompting Essentials** – Google (2025)
