PROFESSIONAL SUMMARY

Backend-Focused Full Stack Software Engineer with 2 years of experience designing and developing scalable backend services, microservices, and API-driven applications using Rust, Java, TypeScript, and Node.js. Experienced in backend development, RESTful services, GraphQL, gRPC communication, distributed systems, and database design across gaming and esports platforms. Skilled in building reliable software systems with PostgreSQL, DynamoDB, Redis, authentication and authorization mechanisms, event-driven workflows, and service integration patterns. Strong interest in software engineering, backend architecture, platform development, scalability, and system design.

TECHNICAL SKILLS

Languages: Java, Rust, TypeScript, JavaScript, SQL

Backend Development & APIs: Spring Boot, NestJS, Node.js, REST APIs, RESTful Services, GraphQL, gRPC, Microservices, API Design, Backend Services, Service Integration

Frontend: Next.js, React.js, Angular

Databases: PostgreSQL, DynamoDB, MySQL, Redis

Architecture & Engineerings: Distributed Systems, Event-Driven Architecture, Data Modeling, Database Design, Scalability, Concurrency Control, Authentication, Authorization, RBAC, API Gateway, Caching, System Design

Tools & Technologies: Git, GraphQL Gateway, Redis Streams

PROFESSIONAL EXPERIENCE

Aretedge Innovations Pvt Ltd

Associate Software Engineer

Aug 2024 – May 2026

Hyderabad, India (On-site)

- Owned the end-to-end design and implementation of the Challenge Module, including backend workflows, API orchestration, business logic implementation, and database design.
- Architected leaderboard allocation and ranking systems supporting score computation, rank updates, and concurrency-sensitive aggregation workflows.
- Developed and maintained backend services powering tournaments, matchmaking, rewards, and gaming platform functionality serving 20K+ active users.
- Engineered scalable microservices using Rust, Java, and NestJS, enabling modular deployment and maintainable service-oriented architecture.
- Implemented REST APIs, GraphQL integrations, and gRPC services to support low-latency communication and cross-service interoperability.
- Designed and optimized PostgreSQL and DynamoDB data models for transactional processing and real-time read-heavy workloads.
- Enhanced backend performance through Redis caching strategies, rate limiting mechanisms, and API gateway integration patterns.
- Implemented event-driven workflows and concurrency-aware reward processing systems to improve reliability and consistency across distributed services.
- Collaborated with cross-functional teams to deliver production-ready software features across backend and platform components.

Aspire Systems

Frontend Developer (Intern → Trainee)

Sep 2022 – Jun 2024

Chennai, India (Remote)

- Completed enterprise-focused training in Java, Angular, Node.js, MySQL, software development practices, and application architecture fundamentals.
- Integrated Angular-based user interfaces with Java backend services and REST APIs following enterprise SDLC processes and coding standards.
- Contributed to feature implementation, debugging, testing, and UI enhancements for internal enterprise applications.
- Participated in software development lifecycle activities including requirement analysis, development, issue resolution, and code reviews.

PROJECTS

Personal Expense Tracker | *Next.js, Supabase*

- Built a full-stack expense management application with real-time data synchronization and direct database integration using Supabase.
- Implemented expense tracking, categorization, reporting, and time-based aggregation features.
- Developed responsive user interfaces and API-driven workflows for managing personal financial data.

Student Management System | *Angular, Java, Node.js, MySQL*

- Developed an academic management platform supporting attendance, examinations, fee management, and student administration workflows.
- Implemented role-based access control (RBAC), and relational database design for secure data access.
- Built modular frontend and backend components to support maintainable application development.

E-Commerce System | *Java, Spring Boot, JavaScript*

- Developed e-commerce workflows using layered backend architecture and modular service separation principles.
- Implemented product management, order processing, and business logic components using Spring Boot.
- Designed backend services and APIs supporting extensible application functionality.

Travel Agency Platform | *Angular, Node.js, MongoDB*

- Developed travel booking and management workflows using REST APIs and responsive user interfaces.
- Built backend services for travel data management and customer booking operations.
- Implemented modular application components supporting maintainability and future feature expansion.

EDUCATION

K.S.R College of Engineering

Bachelor of Engineering (B.E) – Computer Science and Engineering

Namakkal, Tamil Nadu, India

2019 – 2023

CERTIFICATIONS

Rust Programming Essentials – Edureka (2026) | **AWS DynamoDB Fundamentals** – Meta (2025)

Advanced React – Whizlabs (2025) | **Google Prompting Essentials** – Google (2025)
